

Project Design Phase-II

Data Flow Diagram & User Stories

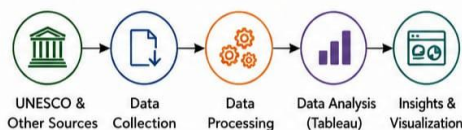

Date	30 June 2026
Team ID	
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	4 Marks

Data Flow Diagrams:

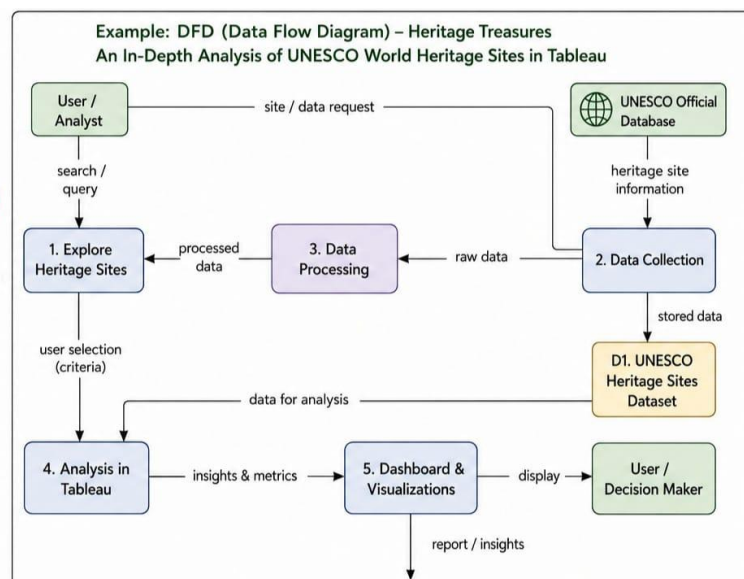

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

Flow

1. Data is collected from UNESCO and other trusted sources.
2. The data is cleaned and processed for consistency.
3. Data is analyzed in Tableau to find key insights.
4. Visualizations and dashboards are created for exploration.
5. Insights help in understanding and preserving our heritage treasures.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Data Analyst	Data Collection	USN1	Collect UNESCO World Heritage Sites dataset from official sources	Complete dataset of UNESCO sites collected from official sources.	High	Sprint 1
		USN2	Import dataset into Tableau	Dataset is successfully imported into Tableau without errors.	High	Sprint 1
		USN3	Handle missing or inconsistent values	Missing or incorrect values are identified and treated properly.	High	Sprint 1
	Data Preparation	USN4	Create calculated fields (e.g., Site Age, Year of Inscription, Region Group)	Calculated fields are created and verified correctly.	High	Sprint 1
		USN5	Clean and standardize data for consistent analysis	Duplicate records removed and data standardized for consistency.	High	Sprint 1
Business User (Decision Maker)	Data Visualization	USN6	Create map of heritage sites by country/region	Map correctly displays heritage sites by country/region.	Medium	Sprint 2
		USN7	Create sites by category (Pie or Donut Chart)	Chart correctly shows distribution of sites by category.	Medium	Sprint 2
		USN8	Create heritage sites over time (Line Chart)	Line chart accurately shows number of sites inscribed over the years.	Medium	Sprint 2
		USN9	Create regional analysis dashboard	Dashboard displays regional patterns with filters for country, category, and year.	Medium	Sprint 2
Business User (Explorer)	Data Exploration	USN10	Filter and explore sites by country, category, and year.	Filters work correctly and update all visualizations.	Medium	Sprint 2
		USN11	View detailed information of a site	Detailed site information is displayed accurately on selection.	Medium	Sprint 2
Project Owner / Stakeholder	Dashboard Development	USN12	Develop interactive Tableau dashboard for all insights	Interactive dashboard with all visuals and filters works successfully.	High	Sprint 2
