

Project Design Phase-II

Technology Stack (Architecture & Stack)

|               |                                                                                    |
|---------------|------------------------------------------------------------------------------------|
| Date          | 30 June 2026                                                                       |
| Team ID       |                                                                                    |
| Project Name  | Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau |
| Maximum Marks | 4 Marks                                                                            |

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1&table 2

**Table-1 : Components & Technologies:**

| <b>S.No</b> | <b>Component</b>     | <b>Description</b>                                                | <b>Technology</b>                      |
|-------------|----------------------|-------------------------------------------------------------------|----------------------------------------|
| 1.          | User Interface       | Interactive dashboards for exploring UNESCO World Heritage Sites. | Tableau Dashboard, Filters, Parameters |
| 2.          | Data Sources         | UNESCO World Heritage dataset.                                    | CSV,Excel,UNESCO Dataset               |
| 3.          | Data PreParation     | Clean,transform,and organize heritage site data.                  | Tableau prep,Table Desktop             |
| 4.          | Data Integration     | Merge multiple heritage datasets for analysis.                    | Joins,Unions,Relationships             |
| 5.          | Database             | Store and mange heritage site information.                        | Excel,CSV,Hyper Extrac                 |
| 6.          | Data storge          | Store processed data for visualization.                           | Tableau Hyper Extract                  |
| 7.          | Visualization Engine | Create maps,charts,and dashboards.                                | Tableau Desktop                        |
| 8.          | Geographic Mapping   | Display heritage sites on interactive maps.                       | Tableau Maps                           |
| 9.          | Analytics            | Analyze trends by country,category,and year.                      | Calculated Fields,Parameters           |
| 10.         | Dashboard Publishing | Share dashboards with users online.                               | Tableau Public/Tableau cloud           |

|     |                   |                                               |                           |
|-----|-------------------|-----------------------------------------------|---------------------------|
| 11. | Security & Access | Manage user permissions and dashboard access. | Tableau cloud permissions |
|-----|-------------------|-----------------------------------------------|---------------------------|

**Table-2: Application Characteristics:**

| S.No | Characteristics                | Description                                                                  | Technology                         |
|------|--------------------------------|------------------------------------------------------------------------------|------------------------------------|
| 1.   | Heritage Data Collection       | Collection of UNESCO World Heritage Sites data from reliable sources.        | UNESCO Dataset, CSV,Excel          |
| 2.   | Data cleaning & preparation    | Remove duplicates, handle missing values, and prepare the data for analysis. | Tableauprep,Table Desktop          |
| 3.   | Heritage site Analysis         | Analyze sites by country, region, category, and year of inscription.         | Tableau Calculated Fields, Filters |
| 4.   | Interactive Dashboard          | Display maps, charts, KPIs, and filters for user interaction.                | Tableau Desktop, Tableau Dashboard |
| 5.   | Dashboard Publishing & Sharing | Publish dashboards for online access and collaboration.                      | Tableau Public / Tableau Cloud     |
